Lawnswood Fencing are proud to also offer an extended range of arches, arbours, garden furniture, log stores, planters and much more in our ZEST decorative products brochure. LFL also stock a massive range of fencing products, sleepers, timbers, concrete posts, gravel boards, aggregate and sawn timber. See our retail price list for more information.

IMPORTANT NOTE: KDM source their panels from four different sawmills, this can give slight differences in manufacture. Please check all match at the time of delivery/order.

All of KDM's imported products are manufactured from selected softwood, stainless steel fixings and treated with a high quality preservative. With the exception of our Willow and Hazel panels all our products are supplied pressure treated with a light green preservative to enhance the decorative style and protect the timber from insect infestation, fungal decay and rot. The treatment colour may vary depending on timber species and chemicals. The light green colour will fade as the timber is exposed to weather conditions and further staining will be required to enhance the products appearance. To maintain the company's policy of continuous product development we reserve the right to change and improve specifications. As with all natural timber products they will be subject to movement and deterioration as they season. This may become evident with shakes, splits and warping. Timber is a natural product and these are not considered to be a fault or defect. LFL recommend barretine premium spirit based wood stain to retreat KDM products. In line with new industry and treatment standards, for in-ground contact products, all of KDM's Fencing Posts, Slotted Posts, Newels and some Arbour and Arch Posts are produced from Redwood only, cut 2/4ex log, kiln dried to 18-28% moisture content and pressure treated to Use Class 4. Blue staining can appear on the timber, this does not affect the treatment or structural strength of the timber – see our terms and conditions for more details.
