- ✓ Kiln dried & structurally graded
- ✓ Incised & treated to Use Class 4
- ✓ Suitable for in ground contact
- ✓ 15 year service life warranty

New standards for decking substructures require a default specification of minimum 15 year service life.

Designed specifically for use directly in ground contact applications and with the added advantage of being eased edge, graded and kiln dried it is more stable than unseasoned timber.

To allow us to achieve Use Class 4 (UC4) we use an incising process that enables the chemical treatment to allow a minimum 6mm penetration into the timber.
