## **KDM EUROPEAN PRODUCTS TERMS & CONDITIONS, WARRANTY/GUARANTEEE**

### **WHAT MAKES KDM PRODUCTS SUPERIOR:**

The UK outdoor timber products market had experienced major developments in added value products over the last 20 years. KDM has been at the forefront of these developments and enhanced its position as the market leader through the use of new technology, improved product design and attention to detail. We have continued to improve the key product features and maintain our business principles to ensure our products stand out from the competition and remain the leading brand in the market.

### **PRODUCT DESIGN**

We aim to offer exclusive and original products that meet the very highest standards of timber manufacturing and design. Whether the product is decorative or functional or a combination of the two our principles remain the same.

### **LOG SELECTION**

When using natural resources careful selection is the fundamental ingredient in creating successful products. All raw material is hand selected to suit the individual intended components. It is vital that each component is produced from the appropriate section of the log and made from the highest quality raw material.

### **PROCESSING & MANUFACTURE**

From the initial stages each piece is checked twice and hand selected ensuring all defects are excluded. Timber is a natural product, the grading process is essential to ensure the highest quality standards are maintained.

### **TREATMENT**

Excluding the willow, Hazel and Oak all other products are pressure treated to use class 3 or 4 with the highest quality preservative. The treatment is designed to enhance the product and extend the life span, they will require further treatment in time. Products intended for in-ground contact are treated to use class 4 to provide a longer life span, save the customer financially and have a reduced impact on the environment.

### **MESSAGE FROM KDM**

All of KDM's products are manufactured from selected spruce and pine species, pressure treated with a high quality preservative to enhance the decorative style and protect the timber from insect infestation. The treatment colour may vary depending on timber species and chemicals. The colour will fade as the timber is exposed to natural weather conditions and further staining will be required to enhance the products appearance. The sapwood in pine, which is the outer section of the log can have a tendency to react with pressure treatment resulting in bright flecks of green but will reduce in a short period. Mould growth can also become evident on sapwood during warm moist weather conditions and where the product is stored/assembled in areas exposed to the sun. If staining does occur, it will not affect the strength or structure of the timber and is not considered a fault but is a natural reaction.

**Best Regards Ivan Walsh KDM Sales Director.**

## KDM 2023 GARDEN PRODUCTS RANGE

We are proud of our exceptional and inspiring range of added value outdoor timber products. The focus of our product range is to provide exceptional quality and product variety to suit all tastes and budgets.

Whilst developing our outdoor timber products we have remained true to our core values of building successful business partnerships. To reinforce our commitment to the environment we hold FSC® and PEFC Chain of Custody Certification.

We Pride ourselves on our quality, range of product groups, stock holding, distribution facilities and offering a prompt delivery service throughout the UK and Ireland. In line with industry and treatment standards, for in-ground contact products all of KDM's planed and sawn posts are produced from Redwood only, cut 2/4 ex log, kiln dried to 18-28% moisture content and pressure treated to Use Class 4.

"KDM's aim is to offer exclusive and original products that meet the very highest standards of timber manufacturing.

We are committed to providing our customers the ultimate in quality products, unrivalled service and value for money. "

All of KDM's products are manufactured from selected softwood, stainless-steel fixings and treated with a high quality preservative.

With the exception of our Willow, Hazel and Oak all other products are supplied pressure treated to enhance the decorative style and protect the timber from insect infestation, fungal decay and rot.

The treatment colour may vary depending on timber species and chemicals. The colour will fade as the timber is exposed to weather conditions and further staining will be required to enhance the products.

### KDM's PHILOSOPHY

KDM's philosophy is to continually improve specifications, including but not restricted too, the size and number components, timber profiles, product design, quality of fixings, treatment and manufacturing development.

Lawnswood Fencing are proud to work in association with KDM. We stock a large range of KDM products. Please speak to our team on 01384 634082 / [Info@lawnswoodfencing.co.uk](mailto:Info@lawnswoodfencing.co.uk) if you have any queries or questions.
